## ART + MATH

A butterfly has **bilateral symmetry**. Color in the butterfly so it is the same on both sides.  
Create a design with bilateral symmetry in the trapezoid.

A nautilus shell is **asymmetrical**. If divided in half, it is different on each side.  
Color in the nautilus shell. Create an asymmetrical design in the oval.

The flower has **radial symmetry**. Color in the flower so the colors are arranged equally around the central point.  
Draw a design with radial symmetry in the hexagon.
