# Water Pollution Solutions

It is estimated that the amount of plastic in the Great Pacific Garbage Patch is equivalent to 250 pieces per person on Earth. Solve the equations below.

250 pieces of plastic x 1 person = \_\_\_\_\_ pieces of plastic.

250 pieces of plastic x 2 people = \_\_\_\_\_ pieces of plastic.

250 pieces of plastic x 5 people = \_\_\_\_\_ pieces of plastic.

250 pieces of plastic x 10 people = \_\_\_\_\_ pieces of plastic.

250 pieces of plastic x 25 people = \_\_\_\_\_ pieces of plastic.

**In the space below, draw and/or write about a water pollution solution!**
